Abstract (en)

[origin: EP1300807A2] Method for opening a security housing, especially of a franking machine, has authorization and unlocking steps. Prior to unlocking a print module (30) is moved sideways using transverse movement means so that the print module takes up an unlocking position perpendicular to the postal item transport direction so that a security housing or access to it can be mechanically released. <??>An Independent claim is made for an arrangement for opening a security housing that is equipped with a mechanical locking device and a print module.
