Abstract (en)

[origin: WO2004084791A1] The invention relates to a warm air cabin, in addition to a method for operating the same. The aim of the invention is to obtain particularly good treatment results. To achieve this, a cooling medium, e.g. an ice granulate, snow or similar is introduced into the cabin (S) from the ceiling once or several times at intervals during the warm or hot air treatment and is distributed in the treatment room by a rotor that is located on the ceiling.
