Abstract (en)

[origin: WO2004089311A2] Agents and methods for treatment of adhesions and fibrotic diseases, through the release of drugs that retard or inhibit fibrotic tissue production. A method for releasing fibrotic tissue-inhibiting agents from a polymer is provided. The polymer/drug combination can be applied directly to affected site as a liquid, gel, or paste. Alternatively, the polymer/drug combination can be injected (intravenous, intraperitoneal, or subcutaneous) in an appropriate vehicle.
