Abstract (en)

[origin: WO2004082863A1] The invention relates to a method for producing a camshaft assembly which consists of a tube provided with a plurality of non-annular grooves which are arranged in parallel and perpendicularly to a longitudinal axis and produced by pressing. The cams are separately pre-produced and fixed to the tube. According to said invention, the embodiment of the grooves (6) by pressing and the fixation of annular cams (5) to the tube are carried out simultaneously.
