Abstract (en)  
[origin: WO2004085274A1] The invention relates to a loading unit (11, 12, 13) encompassing a conveying pallet (14, 15, 16) and palleting trays (1) which are placed on the loading area thereof and the loading areas (5) of which receive a load (18). The palleting tray (1) is characterized in that the loading area (5) thereof is provided with a perforated surface, at least two continuous, spaced-apart, crossing free positions (2, 3) that are open in the direction of the load (18) being arranged on each face of the rectangular palleting tray (1), allowing grippers of handling equipment, which lift the load (18) from the conveying pallet (14, 15, 16) without the palleting tray (1), to be inserted into the open free positions (2, 3).
