Abstract (en)
[origin: US2006266905A1] A device designed to receive elongate goods, such as bottles, which are to be cooled in a refrigerator. The device includes a frame with elongate lateral strips, which can be inserted into a refrigerator and attaches to the conventional horizontal supports or shelving provided in the refrigerator. The device includes a first bar with bearing surfaces for the goods to be cooled, which bar is tiltably attached to the frame. The device also includes a second bar with bearing surfaces for the goods to be cooled, which bar is rigidly connected to the frame
