Abstract (en)

[origin: WO2004088350A1] The invention relates to a method and an arrangement which locates people within a region which is to be monitored and can be used in a mobile manner. At least one transmitter (2) working in the ultra-wide band (UWB) is used, in addition to at least one transmitter/receiver device (transceiver 3) working in the ultra-wide band (UWB) and a receiver (4) working in the ultra-wide band (UWB). The transmitter (2) is arranged in a fixed manner when used in the region which is to be monitored, the transmitter/receiver device (3) is disposed on the person who is to be located and the receiver (4) is arranged on a monitoring computer (control centre) arranged outside the region which is to be monitored and is connected thereto.
