Abstract (en)

[origin: WO2004088640A2] Embodiments of the invention describe a device, system and method for selectively recording an entry corresponding to an identity of a selected item. Some exemplary embodiments of the invention include a portable selection device able to select data associated with identifiable items. The portable selection device may include a selection interface to enter at least one data entry identifying at least one of the items, and circuitry to enable recording of the at least one data entry. Other embodiments are described and claimed.
