Abstract (en)
[origin: WO2004091270A1] The invention relates to an array for electrical connection of an electrical unit (9) by means of a flexible film conductor, said electrical unit having at least one electrical structural component (17) and being arranged inside a housing (10), and also having an electrical component (18) provided outside the housing (10). According to the invention, several structural components (17) are provided in the housing (10), each of which is connected to the corresponding electrical component or components (18) by means of a separate film conductor (6). The inventive array is simple, flexible, handy and safe.
