Abstract (en)
It is disclosed a humidity regulator apparatus in rooms of buildings having walls or other elements such as pillars, stoves, etc. at least partly made of a clayey material (2) or at all events a material such as the crude earth material that is suitable to absorb water and release it into the concerned environment. The apparatus comprises water supplying means (3) for moistening the clayey material, and means (4) for controlled-conveyance to the clayey material of the water fed by said supplying means (3). <IMAGE>
