Abstract (en)  
[origin: WO2004080846A1] The invention relates to a transportation container including a container part (1), into which container part the goods to be transported and stored can be placed, the container part (1) including two ends (2) and two flanks (3) and a bottom (4) and a top (5) part. According to the invention, the transportation container is substantially foldable, and the container part (1) is made of a substantially shaping material, and the container part (1) includes at least one openable and closable hatch (13, 14) for unloading the goods; and arranged in conjunction with the container part (1), at its angles, are angle pieces (6); and arranged substantially about the container part (1) are supporting means (7a-c, 8a-c), at least part of the supporting means (7a-c) being arranged to pass via the angle pieces (6) for arranging the shaping material and supporting thereof into the desired container form.
