Abstract (en)
[origin: WO2004089796A1] The present invention concerns a reusable cutting aid (2a-2h) to be placed in a package (1, 26, 30) for plastic foil (4) or the like. The cutting aid (2a, 2b) in some embodiment has a back part (7) to be received inside the package (1), a middle part (8) abutting the outside of the package (1) and front part (11) having a cutting edge (9) at the upper end. In other embodiments the cutting aid (2c-2h) forms a groove (24, 32) to receive a lid of the package (1, 26, 30) together with the foil (4). A cutting edge (23, 29) is arranged directed towards the groove (24, 32) and the package (1, 26, 30). The cutting aid (2a-2h) is to cooperate with the lid (5) of the package (1, 26, 30) to hold the foil (4) during cutting.
