Abstract (en)
[origin: WO2004079182A1] The invention relates to a high-pressure fuel accumulator (1), mainly to a common-rail injection system comprising a case (2) consisting of a pressure chamber (3) and provided with at least one input orifice and one output orifice. Said pressure chamber is constructed in the form of a through bore which is reliably closed by a tiebolt-nut connection (6, 7) Said invention also relates to a high-pressure fuel accumulator whose pressure chamber is constructed in the form of a blind bore which is reliably closed with a tiebolt (6).
