Abstract (en)  
[origin: WO2004090730A2] The invention relates to a program-controlled unit comprising a memory for storing data and a memory protection device for protecting the memory from read-access operations initiated by non-authorized personnel. Said program-controlled unit is characterized in that it is configured in such a way that it automatically activates the read protection if required and that the read protection can be adapted to given conditions by authorized personnel.
