Abstract (en)

Connection joint for connecting together two or more tubular elements (11, 12) of the frame of an item of furniture. The connection joint is made with an open tubular element (14) and has two faces (15, 16) on the edges of which two fins (21) are made in a single piece and are inserted into mating apertures (23) made on the tubular elements (11, 12). Each fin (21) comprises at least a hole (22); through the holes and through eyelets (24) made on the tubular elements (11, 12), nails (25) or screws (27) are inserted under pressure so as to attach through interference the fins (21), and hence the connection joint, to the tubular elements (11, 12).
