Abstract (en)

The hairspring has one assembly integrated with another assembly that comprises an inner curve (4). The curve is made of a material that is chosen for its mechanical properties and for facilitating the shapeability of the curve according to the most favorable contour for a concentric expansion of the hairspring. The curve has a contour of Grossman curve (14). The former assembly is made by utilizing a LIGA process. An independent claim is also included for a method for manufacturing an assembly of a hairspring.
