Abstract (en)

[origin: WO2004086886A1] An object (1) partly comprising an edible product (2,5) in form of a roll (2) with a filling (5) in a cavity (3) in the roll (2), partly a packaging (15) for the filling (5). The full packaging (15) has a shape mainly complementary to the cavity (3), and the packaging (15) in itself does not form part of the edible product (2,5). The packaging also has a potential exit opening (8) for the filling (5) at one end. The filling (5) can be of many different kinds, for example mince, salads, various slices of meat, and vegetable products. The edible product (2,5) is easy and quick to prepare and easy to eat without risk of the person eating or the surroundings becoming soiled by the filling (5) during this. The filling is easily forced out of the packaging (15) by means of a roller (19) having two cylinders (20).
