Abstract (en)

[origin: WO2004089152A1] The invention relates to a system consisting of a small electrical device (1) and an auxiliary electrical device (4) assigned thereto with a receiving device (3) for the small electrical device, wherein both devices are provided with corresponding first electrical and/or electro-magnetic coupling means (8, 9) for transmitting energy and/or information and at least the small electrical device (1) has at least one additional coupling means (13).
