Abstract (en)
[origin: WO2004089689A1] The invention relates to a vehicle seat and an associated method. The inventive vehicle seat comprises at least one fan, at least one usable surface and at least one air supply orifice. Said fan produces airflow directed into an air channel which is arranged between the usable surface and the air supply orifice. When the vehicle seat is oriented in a direction of the vehicle travel, the fan is situated on the side of the vehicle seat.
