Abstract (en)

[origin: WO2004092464A1] The invention relates to a drive for heald frames (17), comprising a drive motor (18) which is disposed on a housing (10) containing the drive element and a lever system (15). The drive motor is provided with one or several cooling channels which are connected to an area of the housing (10) which is formed in order to receive an oil bath.
