Abstract (en)
[origin: FR2853996A1] The system has a transmission antenna (10) placed between two reception antennas (11, 12) in a manner such that radiating end of the transmission antenna extends above radiating end of the reception antennas. The radiating end of the transmission antenna is found in radiating zones of the reception antennas. The system is placed at edge of a PCMCIA card in a zone placed exterior to a PCMCIA card reader in a computer. An independent claim is also included for an interface card with PCMCIA standard.
