Abstract (en)

The papermaking machine (1), for the production of different types of paper or cardboard or tissue, has an enterprise resource planning (ERP) measurement system (2) to determine quality data during web production which are also used to compute (3) and compare (4) actual and nominal values and give the web production volume. The unit (6) to set the web roll cutting plan takes into account identified web faults, which are cut away for disposal at the roll cutter (7).
