Abstract (en)

[origin: EP1614809A1] The device has a rail (1) fixed on vertical supports (2) by spacers (3). The supports are extended by extension pieces (4) with a support plate (5), at their upper part, to fix a rail (6). An anti-overflow device is fixed between two support posts (P). Each post has squared legs to pre-position and fix with respect to the pieces (4), and an adjusting screw to adjust height and verticality with respect to the supports.
