Abstract (en)
Of the built-in type for the installation thereof in a hole (1) in a wall and comprising a parallelepipedic internal body (2) and a hollow external body (3) also parallelepipedic which is displaced telescopically with respect to the internal body (2) to adapt to different depths which the hole in the wall (1) can have. Additionally it incorporates anchoring means which fix the relative position between the internal body (2) and the external body (3). It has a rectangular plate (4) to which the rear face of the external body (3) is fastened, the position of the safe being secured after injecting sealing material into the gap defined between the hole (1) in the wall and the external walls of the bodies (2, 3).
