Abstract (en)

The device has at least one camera (12) for recording event images, a clock (25) for outputting a date and/or time, at least one memory (16) for storing images, date and/or time and a control unit (14) that associates images, date and/or time and controls the storage process. It has an acceleration sensor (22) and a trigger unit (15) for triggering the memory process depending on received acceleration data. An independent claim is also included for the following: (A) a vehicle holder for an inventive device (B) and an event data writing system.
