Abstract (en)

[origin: EP1616699A2] The method involves unwinding a material strip from a first roller, printing on the strip, spooling the printed strip onto a new roller, unwinding first and second printed strips (16a,16b) from further rollers (12a,12b), feeding the two strips together in an upper structure (17), separating the strips into sub-strips (19a,19b), mixing the sub-strips with an angle rod arrangement (21), longitudinally folding the mixed strips and transversely cutting and folding the sub-strips. An independent claim is also included for the following: (a) a system for production of printed product (b) and a further processing arrangement of a roller printing machine.
