Abstract (en)
[origin: WO2004094897A1] A louvered luminaire comprises means for holding and for electrically connecting a tubular bulb (2) and comprises, when viewed in the radiating direction, a number of louver modules (3), which are mounted in front of the lamp (2) and which have passage openings (5) each provided for radiating light. The louver modules (3) are arranged to form an elongated lighting louver and are held by retaining elements (20).
