Abstract (en)
This innovation relates to a hairdryer with an ergonomic handle and operating switches which allow easy movement of said hairdryer even while said switches are being operated. Said hairdryer, which has a handle (3) attached to a body (4) that houses the motor, the motor cooling fan and the air heating elements, is activated by a plurality of switches (2) and is characterised in that at least some of said switches (2) are positioned at the rear of said motor housing body (4).
