Abstract (en)
The mast comprises a pole body (4) that is connected to a strap (10) at one end. A pole body (6) has a polygonal base and is connected to a base plate (8) at another end and to the strap at the former end. The pole body (6) has a transversal encumbrance strictly lesser than a transversal space defined by the pole body (4) such that a gap (11) separates the body (4) from the body (6) along their circumference. An independent claim is also included for a method for manufacturing a mast.
