Abstract (en)

Illuminating device (1) comprises a current supply cable (40) which is guided through the feeding region between a supply housing (2) and an illuminating body (3). Preferred Features: A guiding element (15) is arranged on the supply housing along which the illuminating body is guided. The current supply cable is guided through a slit provided in the guiding element. The guiding element is formed by a longitudinal guide rail. A light source is arranged in the supply housing.
