Abstract (en)

[origin: WO2004113034A1] The invention relates to a cutting machine for cutting up, in particular, foodstuff products having an unstable outer contour. The product feeding unit of the cutting machine has a number of conveyor and shaping belts, which are distributed over the peripheral contour of the product to be cut, are driven in a revolving manner, and whose conveyor strands can be, in particular, individually placed with a predeterminable pressure against the conveyed product to be cut.
