Abstract (en)

[origin: WO2004089754A1] The invention relates to a method for automatic packing of empty tubes (1) conveyed on a conveyor belt in a packing container receiving a plurality of tubes (1). According to the invention, the conveyed tubes (1) are collected in a continuous line, are then fed in line to an intermediate storage (13) and jointly transferred in a packing container, whereupon the packing container is further transported. The empty tubes (1) are arranged in the transport trays (3) of a feed belt (2) and are continuously collected into rows or partial rows by means of adjustable, individually driven suction cylinders (5).
