Abstract (en)

[origin: FR2854196A1] The rack has a storage platform (11) located on a movable frame (A) that displaces itself along two posts of a ladder (2). Progression is ensured by two progression handles (B) covering the posts and the frame. The frame and handles are connected by a cable (C). The cable is connected to the two handles by two ends of the cable and cables strand passes by a deflecting pulley (14) situated in a lower part of the frame (A).
