Abstract (en)

[origin: WO2004109649A1] A wearable and mobile multi-media data collection tool kit for a creating of an electronic investigation record. The wearable and mobile multi-media data collection tool kit includes an electronic multi-media "Case" file (15) for processing a plurality of multi-media data collection input streams of multi-media investigation information into an electronic case file record, a man-to-machine visual interface or display (25) integrated with the electronic multi-media case file for visually conveying the contents of the input streams of the multi-media investigation information. The tool kit further includes a plurality of multi-media data collection tools (35a, 35b, 35c, 35d, 35e, 35f, and 35g) for inputting the plurality of multi-media collection input streams of the multi-media investigation information.
