Abstract (en)
[origin: WO2004097876A1] The invention relates to an electric rotary switch comprising a switching rotary unit (5) arranged in a housing provided with at least one switching contact (13) acting on switching contact paths (2) associated to socket (1). Said rotary switching unit (5) is coupled with an actuating element (8) and interacts with means (9, 10, 11) for determining switching positions. Said means (9, 10, 11) are associated, on one hand with a face oriented towards the socket (1) of the rotary switching unit, and with the rotary switching unit, on the other hand.
