Abstract (en)
[origin: EP1618824A1] The present invention relates to a vacuum cleaner for domestic cleaning of the type comprising a body (2) adapted to comprise suction means (5) with suction connected to an air intake opening (8), filtering means (6A, 11) to filter the particles contained in the suctioned air, these filtering means (6A, 11) being interposed between the intake (8) and the suction means (5) and a tank (3, 3A) for a fluid (17) associated with the body (2). The vacuum cleaner has the characteristic feature that it comprises means (19, 22) for reducing the speed of the air discharged by the suction means (5) into the tank (3, 3A), these means (19, 22) for reducing the speed of the discharged air being in fluid communication with the suction means (5) via an air discharge path (7).
