Abstract (en)

[origin: EP1618863A2] The object (1) has a container (4) covered with a personalized pattern aspect layer and constituted of a box with two nestable parts. A support device (8) maintains the box in an inclined plane with respect to the horizontal. One of the parts has a lid and four sides that stack around four sides of another part. The device has a base made of combustible material and provided with a cut for receiving a wedge of the container.
