Abstract (en)

Sample tube, for instance for use in a PCR thermal cycler, wherein the tube (1) comprises a steel wall (2). The invention further provides a method for manufacturing a sample tube (1), wherein the sample tube (1) is made substantially from steel. The invention also provides the use of at least one sample tube (1), wherein the at least one sample tube (1) is provided with at least one sample (S), wherein the temperature of the at least one tube (1) is being controlled for controlling the temperature of the at least one sample (S).
