Abstract (en)
The edge gearing has a handle to drive the driving gear and a driving rod section, with handle on the second driving gear and transmission gearing between second gear and driving gear. The second driving rod (4) is powered by a reverse gearing (15) simultaneously with first driving rod (3), so that the first rod or second gear (8) is connected to a pushable coupling part(17) and the coupling part grips the reverse gearing and the second gear then grips the coupling part.
