Abstract (en)

[origin: EP1619642A2] In a first data group, an indication of at least one further data group is transmitted that containing information that supplements the basis information in the first data group. Each piece of supplementary information is provided with a four-bit identifier for the information type. A certain identifier is provided with additional identifier bits which indicate further types of supplementary information. An independent claim is included for a receiver for evaluating the reports transmitted.
