Abstract (en)
[origin: US2005252098A1] The invention is directed to a fixing device for a movable wall or the like with a fixing element which can be brought into its working position by an actuating member that can be actuated manually. In order to provide a fixing device for a movable wall or the like which ensures a reliable and trouble-free operation in a simple manner, it is provided according to the invention that the actuating member is constructed as a turning knob whose rotating movement can be transformed into a longitudinal movement for the fixing element.
