Abstract (en)  
The receptacle (10) has an abrasive unit (40) situated on an outer surface of a body (20) or a closing device (30) that closes or limits an opening of the body. The abrasive unit is configured for exfoliating the skin and presents abrasiveness between preset ranges. The abrasive unit has cells opened on its outer side through discharging edges. The unit (40) is situated on one of large sides of a lateral wall (22). Independent claims are also included for the following: (A) an assembly comprising a receptacle and a cosmetic product (B) a method for fabricating a receptacle.
