Abstract (en)  
[origin: US2006037886A1] A container for a cosmetic product includes a body having at least one opening, and a closure element for closing or restricting the opening in the body. The container includes at least one abrasive element located on the outer surface of the body or of the closure element, with the abrasive element being configured to exfoliate the skin. A method of forming the container is also provided.
