Abstract (en)

The applicator has a control unit (21) that is movable in a direction parallel to a longitudinal axis (X) of a gripping unit. The control unit has an upper wall (46) bulged outwards, extending in its periphery and towards base by an apron (29). The control unit is connected with a rod (11) by a connection unit (22). The rod has an application unit (14) that fetches a product (P) in a container (2) and applies on eyelashes or eyebrows. Independent claims are also included for the following: (A) a product applying and storing device comprising an applicator (B) a method for make-up.
