Abstract (en)

[origin: EP1621463A2] The method involves supplying the printed products (5), rolling them up into a reel and wrapping the reel (2) to form the packet (1). A set of accessory articles (3) is introduced into an inner cavity (19) inside the reel (2). Independent claim describes device with means for coaxially arranging a set of accessories relative to the cylinder axis of the packet. The device includes a stripper to slide the packet over the coaxial setting means.
