Abstract (en)

This invention relates to a container for semidense or liquid cosmetic or pharmaceutical products combined with an applicator (3) for the said cosmetic or pharmaceutical products, the said container (2) comprising a sheet of flexible material (4) welded around the said applicator (3), the said applicator (3) comprising a support (5) preimpregnated with the said cosmetic or pharmaceutical products, the said sheet (4) of flexible material being folded upon itself along a fold line (6) to enclose the said support (5), characterised in that the said support (5) is associated with the said sheet (4) of flexible material and in that the said sheet (4) is welded in such a way as to form a pair of flaps (7, 8) so as to permit a user (9) to open and use the said container (1) without touching the said support (5).
