Abstract (en)

The sheet guiding device in a sheet feeder of a printing press is installed above a feed board (1) and consists of guiding elements provided with spacing at right angles to the direction of feed. The guiding elements (12) which have a guiding surface (15) facing the sheet (8) are installed on a base rail (11) provided at right angles to the direction of feed (9), with its side allocated to the surface of the feed board constructed as a base rail guiding surface (14) with forms one plane with the guiding surfaces of the guiding elements.
