Abstract (en)

[origin: EP1621496A2] The method for transferring a paper or cardboard web (2) passing over a winding roller (5) to a new reel core (3.2) which forms a nip (N) with it comprises cutting off a transfer section (10). The difference in tension between this section and the remainder (b) of the web is kept within a specific limit ( $\Delta$ ). An independent claim is included for a winding machine for carrying out the method.
