Abstract (en)

[origin: EP1621778A1] An electro-pneumatic drive (10) has a positioning control assembly (30) with an electric actuator (11, 12) for a power take off point (13). In a process to operate the positioning control assembly (30), the target power requirement for an actuator (11) and the electrical actuator (12) is determined and the appropriate thrust is divided between electrical and pneumatic power with a high pass and a low pass processor.
