Abstract (en)
The operating knob (2) is swung using the pivot (3) in one or more preferred directions. The pivoting and/or sliding (5) units work with a component (7, 8) producing tactile sensation. The switch (1) casing (16) has upper and lower parts (9, 10). The knob (2) projects out from the casing. The knob can also be rotated, with further provision to generate tactile sensations.
